

REMARKS

The application has been amended to insert the required reference to the parent application, for which benefit is claimed, of this new divisional application. Table 3 has been corrected, as was Table 3 in the parent application

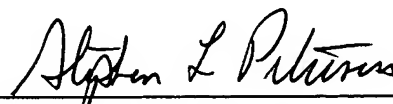

The two method claims (as well as the five catalyst claims that are the subject of the parent application) have been cancelled and new claims 7-10 added. Claim 7 is basically the subject matter of as-filed claim 5 with the catalyst formula of amended claim 1 of the parent application. Claims 8-10 are dependent claims addressing the subject matter of as-filed claim 6.

Please grant any extensions of time required to enter this paper and charge any additional required fees to our deposit account 06-0916.

Respectfully submitted,
